COVER LETTER

T. RIKASH SAMSUDEEN
(+94) 77 901 9021

tuanrikash@gmail.com

Dear Sir/Madam,

This letter is to express my keen interest in applying for a Lead Full-Stack Software Engineer position within your esteemed organisation. I am excited about the opportunity to bring my technical expertise and creativity to contribute meaningfully to your team's goals.

I hold a BSc (Hons) in Software Engineering, which has provided me with strong knowledge in programming, system architecture, database development, object-oriented programming, computational intelligence, and web application development. During my degree programme, I also completed a major project focused on web application development.

Alongside my academic journey, I have gained over 8 years of valuable industry experience working with reputable organisations:

- **Umbrella Transfers Ltd / Umbrella Connect UK, United Kingdom (2025 - Present):** Technical Lead.
- **Aswin.co.uk, United Kingdom (2023 - 2025):** Full Stack Developer.
- **Weconnect BC, Canada (2019 - 2023):** WordPress, Webflow, and Shopify Web Developer.

Through these roles, I have developed strong expertise in full-stack web and application development using technologies including **PHP, JavaScript, TypeScript, React.js, Angular.js, Node.js, Laravel, CodeIgniter, MySQL, REST APIs, GraphQL, WordPress, Shopify, and Webflow**.

In my current Technical Lead role, I contribute to **system architecture, technical planning, solution design, development, code review, and team collaboration**, while working on scalable and user-focused digital solutions.

I also have experience with **AI and automation**, working with tools such as **ChatGPT, Claude, Google Gemini, and LLM-based solutions** for AI-assisted development, workflow automation, research, content generation, and process optimisation. In addition, I have experience in **SEO, digital marketing, paid media management, UI/UX, and graphic design**, allowing me to bring both technical and creative skills to digital projects.

What truly sets me apart is my ability to combine technical expertise with creativity and problem-solving to deliver reliable, scalable, and user-friendly solutions. I thrive in collaborative environments and enjoy taking on technical challenges while continuously improving systems and processes.

My goal is to secure a position with a progressive organisation where I can leverage my experience in **full-stack development, technical leadership, system architecture, AI, and automation** to contribute to innovative and impactful digital solutions. I am confident that my attached CV and portfolio will provide further insight into my capabilities and accomplishments.

I would welcome the opportunity to discuss how my expertise aligns with your requirements. Thank you for considering my application, and I look forward to the possibility of contributing to your team's success.

Yours sincerely,

Tuan Rikash Samsudeen
